AMATYC
STUDENT MATHEMATICS LEAGUE
TEST INSTRUCTIONS

You have one hour to take this test. Students are allowed to enter the testing room from 3:00 – 4:00PM on the exam date. No student will be permitted to leave during that hour. Students are permitted to leave from 4:00 – 5:00PM. No student will be allowed to enter during that hour.

Scratch paper, which will be supplied, is allowed. Also allowed are calculators, including graphics calculators, provided they do not have typewriter-like keyboards (such as, for example, the TI-92) or a disk drive. However, no books, mathematical tables, computers, cell phones, PDAs, or questions are permitted during the test.

You are NOT expected to be able to answer all of the questions; do not become discouraged at the difficulty of the questions. Do not waste too much time on one question, but return to it after you finish the others.

Each question has a 2-point value for a correct answer and a penalty of −1/2 point for each wrong answer. There is no deduction for unanswered questions or for wrong answers to questions that are not multiple-choice. Do not make any random guesses, but do answer a question if you can eliminate some of the choices.
